Minister

S. W. Clarkson
Deputy Minister

P. A. Yark, P.Eng.
Executive Director
Trade and Industry Division

"Ontario Exports by Countries" is presented this year for the first time as an annual companion publication to "Ontario Exports by Commodities."

The information was acquired from Dominion Bureau of Statistics sources on computer print-out sheets showing the origin and destination of Canadian commodity exports by regions across Canada.

Ontario's exports in 1967 reached a new high of \$4,700,000,000 — an increase of 74.1 per cent over the 1965 figure of \$2,700,000,000.

In 1967, Ontario's exports amounted to 18.7 per cent of the gross provincial product. For Canada as a whole, total Canadian exports amounted to 18.4 per cent of the gross national product.

The Ontario exports-per-capita figure of \$655 in 1967, although less than that for Belgium-Luxembourg, was one of the highest in the world. In comparison, exports per capita for Canada were \$558, the Netherlands \$624, West Germany \$406, the United Kingdom \$272, France \$247, Italy \$179, United States \$169, and Japan \$112. The per capita value of exports from Belgium-Luxembourg was \$767 in 1967.

By countries, Ontario's most important trading partner was the United States. In 1967, the United States accounted for 75.1 per cent of Ontario's exports. Between 1966 and 1967 these exports increased by \$799,400,000. Major increases were accounted for by road motor vehicles and parts, crude bituminous substances, and nickel and alloys.

The United Kingdom was Ontario's second largest trading partner in 1967, with \$423,900,000, but accounted for only 9 per cent of Ontario's exports. Largest single export items to Britain were: nickel ore, concentrates and scrap (\$92,000,000), unmanufactured tobacco (\$36,000,000), copper and alloys (\$32,000,000), precious metals in ores, concentrates and scrap (\$29,900,000), and unmilled cereals (\$17,000,000).

Ontario exports to all areas, 1966-1967:

	1966	1967	% Change
	\$ million	\$ million	1966-1967
North America	2,716.5	3,495.8	+28.6
Western Europe	635.7	692.5	+ 8.9
Eastern Europe	12.5	11.1	-11.2
Middle East	22.4	16.5	-26.3
Other Africa	48.8	46.5	- 4.7
Other Asia	63.5	95.6	+50.5
Oceania	68.1	93.1	+36.7
South America	126.4	125.9	- 0.4
Central America and Antillies	68.5	78.1	+14.0
Total Ontario Exports *	3,762.7	4,655.6	+23.7

(These figures may not add due to rounding)

Ontario Department of Economics and Development
Regional Development Division

what is regional development?

Regional Development, very simply put, is a partnership between three agencies concerned with Ontario's economic growth.

The three partners are the government of the province, local municipal governments, and public-spirited local groups and individuals.

To this regional development program the provincial government, through its Department of Economics and Development, contributes a liaison staff and up to \$15,000 per year to match the sums raised for each Development Association by local governments, agencies and individuals. The provincial industrial development offices abroad and at home work with and through these regional associations.

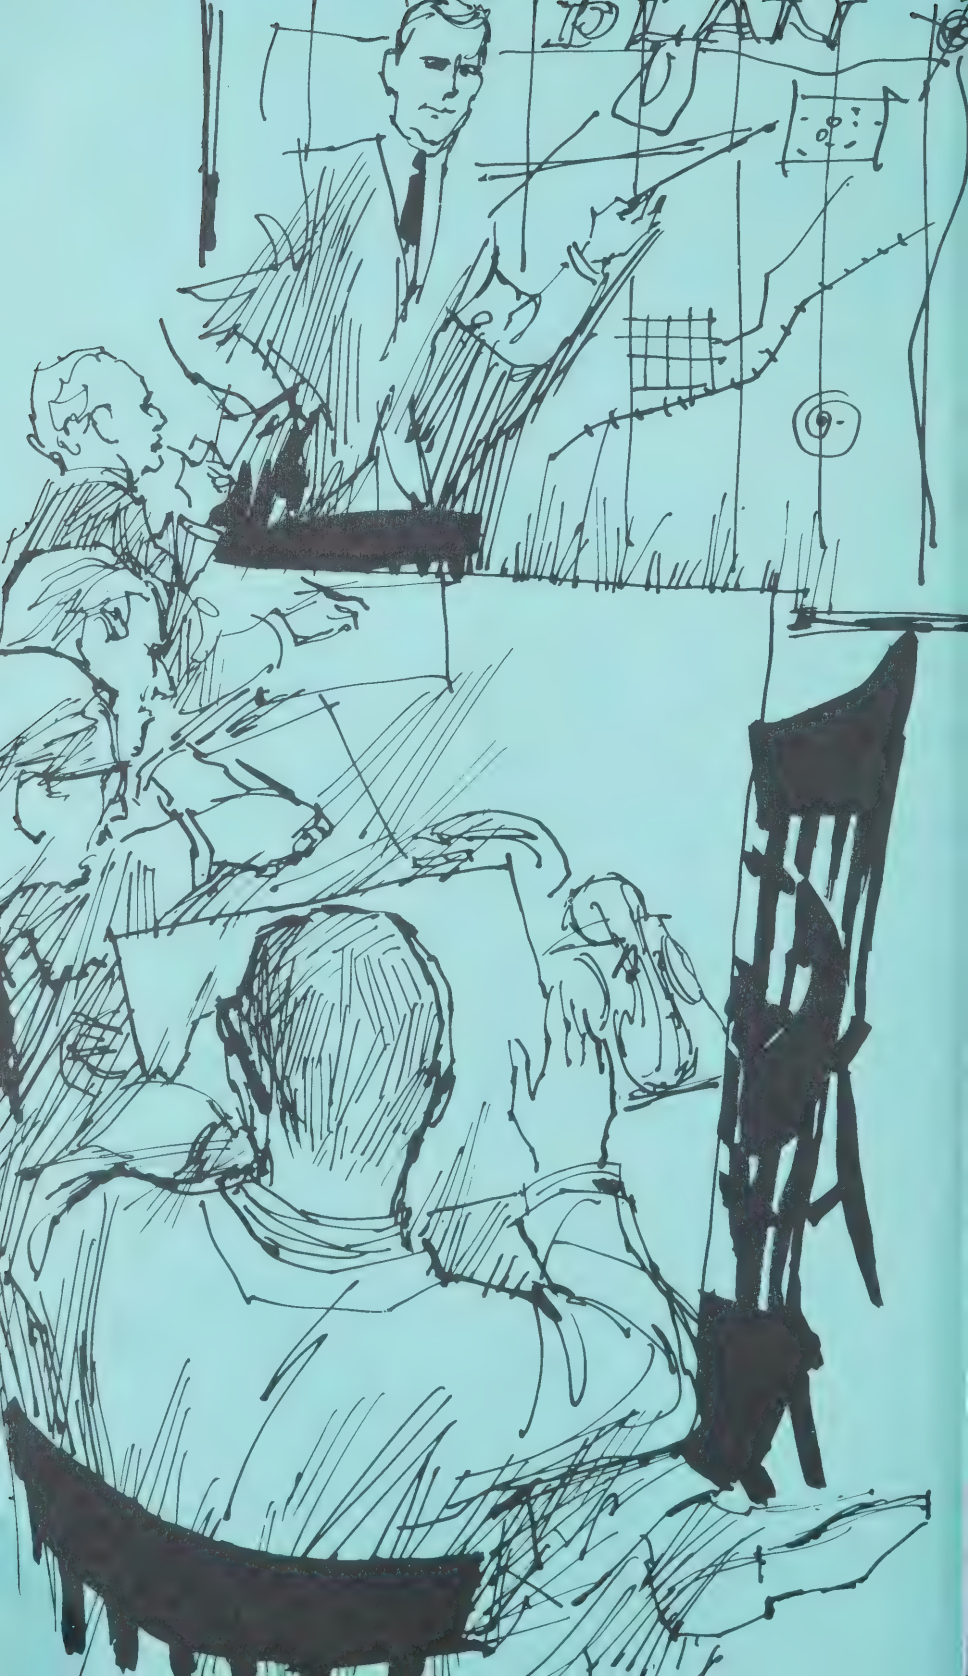

Local governments, investing up to 10c per capita per annum on behalf of their residents, and associate members, whose annual fees vary from region to region, provide the volume of the associations' budgets.

Each Development Association is an individual corporation, electing its own directors, making its own policy decisions, determining how its funds and its staff can best serve the planned growth of its own region.

The provincial government elects to the boards of each Association only one director. While the provincial offices and staff offer full consultation and cooperation, initiative for action lies at the local level. Policies can be made to fit local problems and solutions locally found.

The Government of Ontario believes in this type of regional development organization and its departments are using it because it represents a working democratic partnership suited to the times.

Local development serves the local citizen best when it takes into account regional development and harmonizes with it. Today more than ever before, the township, the village, the town, city, county and district are economic partners. What each does affects the other. We live in regional economic neighbourhoods and this is not a theory; it is a fact.

In initiating and financially supporting regional development through legislation, the Government of Ontario in the 10 Development Associations has officially recognized both the real need for, and the great potential benefits which stem from this Provincial-Municipal partnership.

Just as important, however, it recognizes the essential role to be played in this relatively new phase of regionally-planned economic growth by dedicated individual citizens, recruited locally, whose compensation is the very real satisfaction gained in the service of their fellow-men.

what type of program is possible?

Regional Development has horizons as broad as the vision of the people of Ontario but as local as necessary.

Co-operation is the keynote of success.

Economic, municipal, recreational, agricultural and other problems vary greatly between regions. A successful program is one that most soundly meets the unique needs of its distinct region.

Projects are decided by the boards of directors of each Association.

Rural and the urban municipalities each contribute to the overall economic development of the regions.

Some of the areas appropriate to regional study and action are:

- Tourism
- Industrial Promotion
- County and Regional Publicity
- Agricultural Problems
- Regional Research
- Community Planning
- Conservation
- Parks

when did it start?

At Ottawa in June 1954 a meeting was jointly organized by the then Eastern Ontario Associated Boards of Trade and Chambers of Commerce and the Ontario Government.

This meeting was attended by the Premier of Ontario and seven Cabinet Ministers representing the Departments of Agriculture, Education, Highways, Lands and Forests, Mines, Planning and Development, and Travel and Publicity.

As a result the first Regional Development Association was formed—the Eastern Ontario Development Association.

For the purpose of the program the Province was initially divided into nine economic regions to correspond with the economic regions used by the Ontario Department of Economics and the Dominion Bureau of Statistics for statistical purposes.

Subsequently, the Southwestern region of Ontario was divided into two now known as Lake Erie and Lake St. Clair regions, making a total of ten Economic Regions.

how is it financed?

Basic financing is the responsibility of participating municipalities who contribute on a per capita basis.

The Ontario Government provides a matching contribution up to a maximum of \$15,000 per annum.

The per capita rate is determined by the board of directors of each Association and is subject to change by the Board.

Per capita contribution varies up to 10c per capita with some Associations placing maximums of \$1,500 to \$2,500 per member municipality.

Associate Memberships:

In many of the Development Associations provision is made by by-law to solicit and receive grants from interested organizations and industries who would like to contribute financially to the work of the Development Association.

The policy governing associate membership varies from region to region at the discretion of the Board of Directors.

what does a municipality or individual get out of regionalism?

A municipality or an individual can expect to "get out of it" only in proportion to the effort "put into it."

Participation is voluntary and the individuals serve without pay.

The only salaried employees are the general manager and his staff, all of whom are hired by the board of directors.

No municipality should expect to contribute funds and, as a result of this contribution, immediately expect to receive a new industry or such other similar benefit.

Regional Development is a long-range, never-ending program. Benefits may come today, tomorrow, or three years from now—but only if municipalities back up their financial contribution with personal effort, seeing that their contribution of money is augmented by contributions of their time, talent and resources.

The diagram is an organizational chart for the Regional Development Association. At the top is the association's name in a cloud-like shape. A large downward arrow points to a row of three boxes: 'Municipalities', 'Interested Citizens', and 'Department of Economics and Development'. Below these is a large oval containing 'Elected President'. From the president, two boxes branch out: 'First Vice-President' and 'Second Vice-President'. Below these is a row of five boxes labeled 'Zone 1' through 'Zone 5', preceded by the text 'Directors representing all zones & sectors'. A final large downward arrow points to a box at the bottom labeled 'General Manager Office Staff'.

This is a "self help" program.

Regional Development is a tool which municipalities, banded together, can use to build a healthier economy in their region. All communities prosper if their surrounding areas prosper.

No particular municipality by reason of size can dominate policy unless the lack of interest and apathy of the other participating municipalities permit it.

who manages the program?

The participating Municipalities themselves manage the Regional Association.

1. The Regional Development Association draws up its own governing By-Laws and is incorporated under the Ontario Corporations' Act.
2. The affairs of the Association are directed by a Board of Directors consisting of a President, two Vice-Presidents and a number of Directors sufficient to represent all sections within the region.

The Board is composed of representatives from the Zones. These are sub-units of the Regional Association working within individual Counties and electing their own regional representatives from members appointed to the zone unit by the participating municipalities.

Usually one half of the Directors are elected Municipal representatives, and the other half are citizens whose experience is valuable to the organization.

NOTE: This procedure will vary in accordance with the requirements of an individual region.

A representative from the Department of Economics and Development is a member of the Board of Directors for the purpose of liaison; in this way the Government is kept fully informed on all phases of operations and achievements.

3. The President is elected for a term not exceeding two years, and the Directors are usually replaced on a rotating basis so that new ideas and new initiative will be constantly introduced into the program.
4. The Association appoints a full-time General Manager and other staff as required.
5. The Board of Directors meets each month in regular session

at which time the General Manager presents a full financial and operation report.

6. For ease of operation each Region is divided into three to seven Zones, depending on the geographic area of the region.

Zone Organization

With most regional associations the participating municipalities in each zone appoint two representatives to the zone organization—one of whom shall be an elected member of council or a council appointee.

The other member is an individual who, by reason of specialized knowledge or leadership in the community, can make a contribution to regional development.

Each zone organization annually elects from among their membership a Chairman and Vice-Chairman and appoints a zone secretary who is not necessarily a member of the zone organization. However, the above procedures may vary in individual associations.

Zone organizations meet in regular session at least six times each year with zone executive meetings encouraged in the intervals.

From zones come the projects and ideas for consideration and action at the Board of Directors' level.

does it duplicate other programs already in operation?

NO—it definitely is not designed to be a duplication.

All the facets of programming are designed to assist but not to duplicate existing programs, either municipal, regional, provincial or federal.

Planning and promoting in regional economic neighbourhoods is sound because it keeps municipalities working together where co-operation, not competition, is needed.

The idea of economic regions does not in any way restrict the role of local Government; rather it permits it to work more effectively across a broader area.

Regional programs are merely co-ordinated municipal programs.

A sound Provincial program is one based on an assembly of regional programs.

Most problems of government and growth today go beyond municipal boundaries and can be solved on a regional basis,

e.g. Highways

Waterways

Public Utilities

Parks

Conservation

Community Planning

etc.

some of the programs now being undertaken by development associations

The list is long and varied, but a few examples are outlined below.

INDUSTRIAL—The Development Associations are promoting the very important Industrial sector of our economy.

Annual Industrial surveys of municipalities are made, and from these a Regional Brochure is published to furnish authentic information for Industrialists who are contemplating new plant locations in Ontario.

RESEARCH—Some Associations are now publishing a trade directory listing: products, manufacturer, and all vital statistics of the Industrial and Commercial economy of the region.

Associations co-operate with local Municipal Industrial Commissioners in aiding firms interested in exporting, manufacturing arrangements under license agreements, sales missions, etc.

Some regional managers make periodic trips to foreign countries in order to publicize the advantages of plant facilities, markets, etc., in their respective regions.

TOURISM — Without exception, all Associations are actively engaged in some phase of the development of the Tourist Trade in their respective regions.

This is done by publishing Tourist Maps, exhibiting Tourist Booths at Sportsmen's Shows in U.S.A. and Canada, Press, Radio, T.V., etc.

This publicity campaign is carried on in co-operation with local Tourist Councils within regions.

AGRICULTURE — In the broad sense of the term "INDUSTRY", the agricultural resources of Ontario occupy a very important position in the economical and industrial development in all regions of the province.

Regional Development Associations appoint an Agriculture committee, usually at both Zone and Board of Directors' levels. These committees work in close liaison with the Department of Agriculture, local agriculture representatives, Agricultural Rehabilitation and Development Agency and other groups for the improvement of all types of farm production, processing and marketing. Several briefs, prepared by very capable committee members, have been submitted to Government authorities recommending suitable action and covering such areas as Land Use Surveys, recommendations for legislation for problems peculiar to farm production, tree farms for marginal land and other conditions which today confront our agricultural population.

EDUCATION — One established Regional Development Association conducted a survey of skills used by local industries in the region, and found in many cases that higher qualifications were required than those supplied by Vocational School. In view of this, the information was passed on to the Department of Education with a request that a Technical Institute be established for the regional area.

FINANCIAL — Several Regional Development Associations conducted surveys on the need for a Regional Development Fund to provide capital for sound job-producing projects for which funds are not readily available through normal lending institutions. In one instance, aid was given in the organization of a Regional Trust Company to provide local mortgage money not otherwise available.

INDUSTRIAL SURVEYS — All Regional Development Associations work in close liaison with the Municipal Branch of the Department of Economics and Development to provide industrial surveys for municipalities that request this

service. They also assist local planning committees in the organization of Industrial Commissions.

PLANNING—Regional Development Associations encourage land use planning in co-operation with the Community Planning Branch of the Department of Municipal Affairs in those communities not yet organized, and the broadening of planning areas in the communities where Planning Boards exist.

CONSERVATION—All Associations work in close liaison with Regional Conservation authorities to provide adequate Parks and Playgrounds for citizens of each region.

how often do meetings take place?

1. Boards of Directors

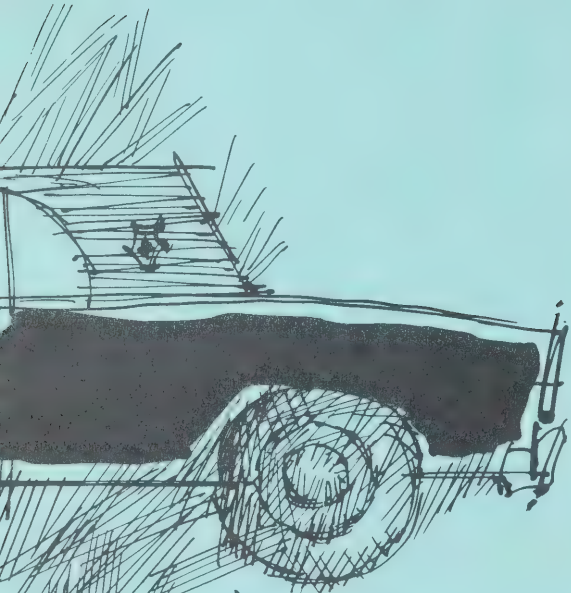

The Boards of Directors usually meet monthly.

Special meetings and the frequency of board meetings is dependent upon the distance and transportation costs in each individual region.

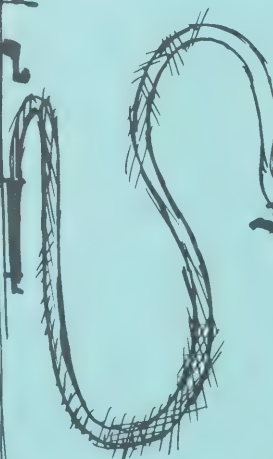

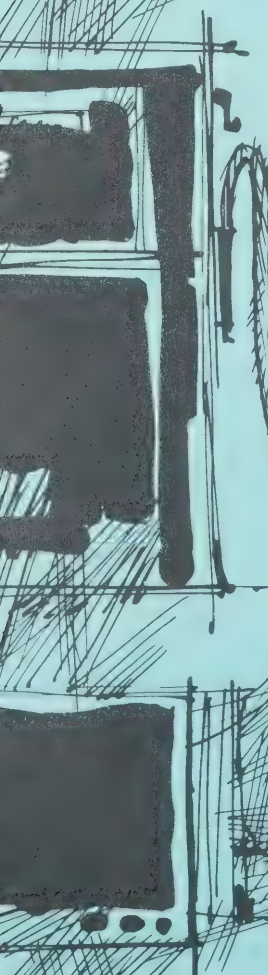

2. Zone Meetings

Meetings at zone level are at the discretion of the individual Association.

Normally, Zone meetings are held somewhat less frequently than Board Meetings. Some zones carry a heavier work load than others, and meetings are in direct proportion to the number of projects initiated at zone level. An annual meeting for the purpose of electing officers is held in each zone.

a development
association
is a vehicle only

...the money
is gas...

but somebody
has to gas up
& decide where
they want to go

how can an individual citizen help?

If you as an individual citizen have the public interest at heart, and have ideas to contribute, you can certainly help.

Zone organizations are in constant need of public support by citizens of each community to further the regional concept. Meetings are open to the public.

Participation is voluntary and unpaid.

As a citizen, contact your local council to obtain the detailed information on zone meetings and representation.

is there a place for women?

Very definitely:—

It is not restricted to men.

Any individual who has the public interest at heart is welcomed to participate at zone level. From the zones come the representatives to the Board of Directors.

Some of the most industrious participants in Development Associations are women.

where are the headquarters?

The office quarters of an Association are placed in a municipality, the location of which is determined by the Board of Directors.

The choice of headquarters is made after all factors have been considered—that is, geography, services and rents, among others.

The fact that the municipality is or is not a participating member does not necessarily determine the location of the headquarters.

what is the ontario regional development council?

In 1958 the Ontario Regional Development Council was formed by the existing Development Associations.

This Council consists of two officers from each region—the General Managers to attend in an advisory capacity.

The purpose of this council is to co-ordinate the policy of the various Regional Development Associations so that the aims and purposes of each Association will be in harmony with the overall effort to provide a healthy economy in the Province of Ontario.

It is an advisory and liaison body to and with the Department of Economics and Development and Government generally.

A representative of Government attends on invitation only.

Finances of the council are paid from the funds of the participating Regional Development Associations.

At present two meetings per year are held at a time and place designated by the Development Council.

A President is elected by the delegates on an annual basis

INTRODUCTION

The 1969 edition of "Ontario Exports by Countries" is the third such publication. The 1967 edition contained information for the years 1966 and 1967, and this edition compares 1968 and 1969. Ontario commodity exports by countries have now been compiled for four years. For added interest we have shown some comparisons between the years 1966 and 1969.

"Ontario Exports by Countries, 1969" has a revised format. In order to provide users with a better overall picture on Ontario exports with comparisons and changes, our domestic export statistics are divided as follows:

- (1) Group Number
- (2) Commodity description
- (3) Value of Ontario exports—1968
- (4) Value Ontario exports—1969
- (5) Value of Canadian exports—1968
- (6) Value of Canadian exports—1969
- (7) Ontario as percentage of Canadian exports—1968
- (8) Ontario as percentage of Canadian exports—1969
- (9) Percentage changes of Ontario exports 1968-1969

Data on Ontario re-exports by countries are appended to the above statistics.

These statistical data were acquired from the Dominion Bureau of Statistics sources on computer tapes, showing the destination of Canadian and Ontario exports.

The classification used in "Ontario Exports by Countries" is the Standard Industrial Classification of D.B.S. The values are F.O.B. at point of lading.

In addition to the statistical data on Ontario domestic exports and re-exports which we publish on a yearly basis, we also have computer data on Ontario and Canadian exports for the current year by quarters: These additional data are available upon request. Please direct your request, stating group number and country to:—

EXPLANATORY NOTES

Ontario Exports: This term includes both Ontario domestic exports and re-exports.

Ontario Domestic Exports: These include both goods which are wholly produced in Ontario and goods previously imported which have been changed in form by further processing in Ontario.

Ontario Re-Exports: Goods which are imported into Ontario, not re-fabricated, re-processed, re-converted, or changed in any form, and subsequently re-exported to other countries.

ONTARIO EXPORTS BY COUNTRIES, 1969

GENERAL OUTLINE

In 1969, Ontario exports totalled \$6.8 billion. This represents an increase of 18% over the 1968 level. This expansion in Ontario's exports is also reflected in Ontario's increasing share of total Canadian exports, from 32.1% in 1966 to 45.9% in 1969.

EXPORTS OF ONTARIO AND CANADA, 1965-1969

YEAR	ONTARIO \$ MILLION	CANADA \$ MILLION	ONTARIO AS % OF CANADIAN
1965	2,733	8,526	32.1
1966	3,763	10,325	36.4
1967	4,656	11,411	40.8
1968	5,971	13,605	43.9
1969	6,815	14,869	45.9

Ontario's per capita exports amounted to approximately \$909 in 1969, and accounted for 21.1% of gross provincial product. This is among the highest in the world: Canadian per capita exports in 1969 amounted to approximately \$708.

The regional distribution of Ontario's customers follows the traditional pattern: the United States is overwhelmingly important, accounting for 72% of all Ontario exports. Over 90% of all Ontario exports go to the U.S. and Western Europe.

Ontario's contribution to Canadian exports, varies from one world region to another, as can be seen from the following table.

ONTARIO'S POSITION IN CANADA'S EXPORTS 1969

(\$,000)

	ONTARIO EXPORTS	CANADIAN EXPORTS	ONTARIO AS % OF CANADIAN
Western Europe	659,983	2,271,266	29.1
Eastern Europe	7,624	38,671	20.0
Middle East	24,571	66,865	36.7
Other Africa	46,740	119,176	39.2
Other Asia	194,500	1,197,842	16.2
South America	161,007	303,308	53.1
Central America & Antilles	113,879	310,219	36.7
North America	5,606,579	10,561,189	53.1
	6,814,883	14,869,203	45.8

In the regions the largest share of Canadian exports goes to North America, where Ontario has a share of over 53%. By commodity groups, the most important is "End products, inedible". This is due in large part to the Canada-U.S. Auto Pact, though significant exports of pulp and paper, nickel and alcoholic beverages were recorded. In contrast to this, Ontario's share of total Canadian exports is smaller in Western Europe, Asia and Oceania. In Western Europe, where Canadian exports of fabricated and crude materials are more dominant, Ontario accounts for only 29% of Canadian exports. In Asia and Oceania, where competition from the U.S. and more specially Japan, is very strong, for Ontario products, Ontario exports account for only 16% of total Canadian exports to these regions.

The regional distribution of Ontario Exports in 1969 was as follows (\$'000).

REGIONAL DISTRIBUTION OF ONTARIO EXPORTS

(\$'000)

DESTINATION	DOMESTIC EXPORTS	RE-EXPORTS	TOTAL	%
Western Europe	648,441	11,542.2	659,983	9.7
Eastern Europe	6,794	829.7	7,624	0.1
Middle East	23,493	1,078.5	24,571	0.4
Other Africa	44,946	1,793.9	46,740	0.7
Other Asia	187,316	7,184.0	194,500	2.9
South America	157,134	3,872.9	161,007	2.4
Central America and Antilles	108,852	5,027.3	113,879	1.6
North America	5,386,921	219,657.7	5,606,579	82.2
	6,563,897	250,986.2	6,814,883	100.0

By regions, Eastern Europe and the Middle East constitute the smallest markets for Ontario: taken together, these two regions account for only 0.5% of total Ontario exports, and none of the countries in these two regions import as much as \$5 million from Ontario. With the exception of the Republic of South Africa, none of the African countries imported over \$2 million from Ontario.

By countries, the ten largest importers in 1969 of Ontario exports are the United States, United Kingdom, Australia, Norway, Venezuela, Western Germany, Japan, Mexico, the Republic of South Africa, and Argentina. Collectively, these ten countries accounted for over 94% of Ontario exports. The value of Ontario exports to these 10 countries increased from \$3.4 billion in 1966 to \$6.4 billion in 1969, or by 88%. Exports to Japan, while only 7th in total, have been growing at the fastest pace, having increased 160% between 1966 and 1969, from \$20 million to \$52 million. The index number of Ontario exports to the 7 largest importers, is provided for in the following table.

EXPLANATORY NOTES

These statistical data were acquired from Statistics Canada sources on computer tapes, showing the destination of Canadian and Ontario exports.

The classification used in **Ontario Exports by Commodities** and **Ontario Exports by Countries** is the standard Industrial Classification of Statistics Canada. The values are F.O.B. at point of lading.

ONTARIO EXPORTS: This term includes both Ontario domestic exports and re-exports. Ontario Domestic Exports include shipments abroad of goods wholly produced in Ontario, together with exports of previously imported goods which have been changed in form by further processing in Ontario.

Re-Exports or exports of foreign products include only goods previously included in import statistics which are re-exported from Ontario in the same form as when imported. Minor operations such as cleaning, sorting or re-packing are not considered as changing the basic structure of imported goods.

Our statistical data on Ontario exports for 1970 are supplemented with information on Ontario's exports "by stage of fabrication". A classification of our exports on the basis of the degree of manufacture provides data which indicate the relative importance of the various sectors of the economy in our trade.

Statistics under the heading "Stage of fabrications" are applied to three groups, namely Crude Materials, Fabricated Materials, and End Products which are the groupings used by Statistics Canada.

Crude Materials include natural products not further processed than cleaned or prepared for shipment (Section I, III and parts of Sections II, and VI of Statistics Canada classification).

Fabricated Materials include items which are used for further processing by secondary industries (Section IV and parts of Section II and VI).

End Products comprise commodities which have attained their final degree of processing (Sections V and parts of Section II and VI).*

*For a detailed definition, see Special reprint from the Canadian Statistical Review, May 1970, "Canadian Foreign Trade by Stage of Fabrication".

INTRODUCTION

The expansion of our economy is closely related to our export performance. Our domestic market is relatively small and consequently we have difficulty in supporting a wide diversity of products in our domestic manufacturing industry, and in achieving benefits from large-scale production. The expansion and diversification of exports is an essential part of Canada's and Ontario's economic future. Any decrease in our exports would slow down the pace of our economic progress, with consequent repercussions in all aspects of our national life.

At present, we are faced with drastic changes in foreign markets, and we must plan for the future accordingly. We need to include new products in our exports, penetrate new foreign markets, and increase our exports to existing ones.

Ontario needs to increase its exports of manufactured goods. The increase in production and sales in this sector will provide a basis for improved competitiveness, and result in greater job opportunities.

Ontario exports continued to expand in 1970; the total was \$7,527 million, an increase of 10.5% over the previous year. However, Ontario's share of exports to total Canadian exports in 1970 decreased from 45.9% in 1969 to 44.6%. The principal reason for this was that Ontario exports of the Section "Food, Feed, Beverages and Tobacco" increased at a slower rate than the Canadian total in this Section.

The comparison between exports of Ontario and Canada, 1965-1970, is as follows:

<u>Year</u>	<u>Ontario</u>	<u>\$millions</u> <u>Canada</u>	<u>Ontario as % of Canada</u>
1965	2,733	8,525	32.1
1966	3,763	10,326	36.4
1967	4,656	11,411	40.8
1968	5,970	13,574	44.0
1969	6,815	14,869	45.9
1970	7,527	16,886	44.6

There was some narrowing of the total value of Ontario exports in 1970, in comparison with the yearly increases of previous years, but Ontario's export position remains strong.

Exports contributed 21.7% of the Gross Provincial Product in 1970. This high share in GPP makes exports a very sensitive part of Ontario's economy; Ontario exports per capita in 1970 were \$978, and this rate is one of the highest in the world.

Several world regions shared the expansion of Ontario exports in 1970. Regional distribution of Ontario exports in 1970, compared with 1969, was as follows:

	<u>1969</u>		<u>1970</u>	
	\$million	% of Total	\$million	% of Total
Western Europe	659.9	9.7	967.6	12.8
Eastern Europe	7.6	0.1	20.2	0.3
Middle East	24.6	0.4	25.5	0.4
Other Africa	46.7	0.7	58.2	0.8
Other Asia	108.0	1.5	153.4	2.0
Oceania	86.5	1.4	110.0	1.5
South America	161.0	2.4	191.5	2.5
Central America and Antilles	113.9	1.6	145.3	1.9
North America	5,606.6	82.2	5,855.6	77.8
Total	6,814.8	100.0	7,527.3	100.0

Ontario Domestic Exports by Section and Stage of Fabrication

The presentation of Ontario domestic exports by state of fabrication is based on methodology worked out by Statistics Canada, which requires a secondary classification of the commodities in certain sections of the Standard Commodity Classification*. Comparing 1969-1970, Ontario domestic exports by stage of fabrication were:

<u>Ontario Domestic Exports</u>		<u>\$'000</u>	
<u>Section</u>		<u>1969</u>	<u>1970</u>
I	Live animals	26,611	35,958
II	Food, feed, beverages & tobacco	353,707	385,037
	Crude materials (A)	122,455	145,969
	Fabricated materials (B)	45,887	54,187
	End products (C)	185,364	184,881
III	Crude materials, inedible	577,339	733,774
IV	Fabricated materials, inedible	1,322,375	1,605,187
V	End products, inedible	4,268,007	4,491,134
VI	Special transactions — trade	15,858	12,680
		<u>6,563,897</u>	<u>7,263,770</u>

<u>Stage of Fabrication</u>			
Crude materials (Sections I, IIA, III)		726,406	915,700
Fabricated materials (Sections IIB, IV)		1,368,262	1,659,374
End products (Section IIC, V)		4,453,371	4,676,015
Special trade transactions		15,858	12,681
		<u>6,563,897</u>	<u>7,263,770</u>

*See Explanatory Notes, Page 3

Western Europe

The most significant regional increase in Ontario exports in 1970 was to Western Europe. In these highly competitive markets, Ontario exports increased in 1970 from the previous year by \$307.7 million or 46.6%. The most important increases in our exports to Western Europe in 1970 compared to 1969, occurred in the following countries: the United Kingdom (\$120.2 million); Norway (\$82.8 million); Belgium and Luxembourg (23.3 million); France (\$19.7 million); the Netherlands \$16.8 million) and West Germany \$15.7 million). The balance of the increase was shared in smaller amounts by other West European countries, with the exceptions of Sweden, Finland and Iceland, where our exports showed a slight decrease from the previous year of \$1.1 millions.

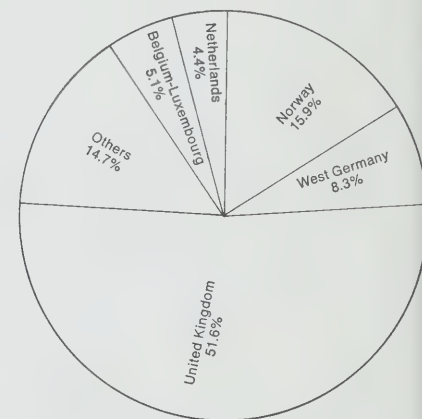

Ontario exports to West Europe, 1970, in percentages were as follows:

By stage of fabrication, our domestic exports to Western Europe in 1970 were as follows:

1970	\$million	% of Total*
Crude materials	495.1	52.0
Fabricated materials	274.7	28.9
End products	182.2	19.1

*Total of Ontario Domestic Exports not including "Special Transactions, Trade."

ONTARIO EXPORTS TO WEST EUROPE

Eastern Europe

The East European market is expanding rapidly and holds strong potential for Ontario exports. Our exports to this area, which consist of some 363.7 million people (1968), in 1970 were \$20.2 million, or 0.3% of total Ontario exports.

Canadian and Ontario exports to East European countries excluding agricultural products, are minimal: they do not follow the same pattern as exports from other Western countries which are geographically closer to the East European market, and more market-oriented toward East Europe. Although the East European market is highly competitive, prospects for our exports to East European countries are encouraging.

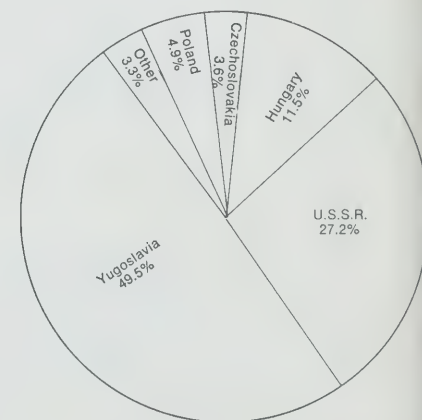

Ontario exports to East European countries in 1970 in percentage were as follows:

Ontario domestic exports to Eastern Europe in 1970, by stage of fabrication were as follows:

1970	\$million	% of Total*
Crude materials	3.1	15.8
Fabricated materials	7.6	38.8
End products	8.9	45.4

*Total of Ontario Domestic Exports not including "Special Transactions, Trade".

ONTARIO EXPORTS TO EASTERN EUROPE

Middle East

After East Europe, our exports to the Middle East represented the smallest share of total Ontario exports in 1970. They were \$25.5 million or 0.4% of total Ontario exports to all areas.

The Middle East is probably one of the most promising of world markets. It is the largest crude oil producing area in the world and the oil income of Middle East countries indicates rapid market expansion.

Ontario exports to the Middle East in 1970, in percentage were as follows:

Ontario Domestic Exports to the Middle East in 1970, by stage of fabrication, were as follows:

1970	\$million	% of Total*
Crude materials	.8	3.4
Fabricated materials	8.2	34.3
End products	14.9	62.3

*Total of Ontario Domestic Exports, not including "Special Transactions, Trade".

ONTARIO DOMESTIC EXPORTS TO THE MIDDLE EAST

Africa

Ontario exports to Africa in 1970 were \$58.2 million or 0.8% of our total exports; of this amount, \$40.9 million went to one country, the Republic of South Africa. Of the thirty-two countries in this region which are listed in our statistics, Ontario exports to twenty-seven countries were less than \$1 million in total.

Africa is not a uniform market. There are three major market areas: North Africa, Middle Africa and South Africa, each with specific needs and opportunities. On the whole, Africa is a growing market with huge human potential. According to the United Nations' estimates, Africa's population by 1980 will be about 455 million, or roughly 120 million more than at present.

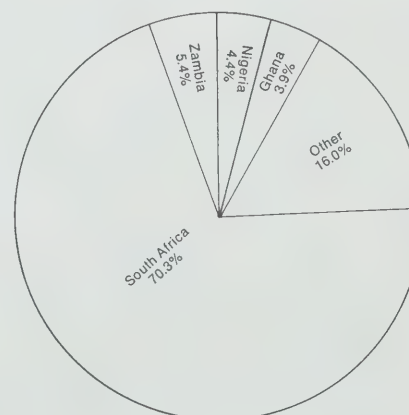

Ontario exports to Africa 1970, by countries in percentage were as follows:

Ontario Domestic Exports to Africa in 1970, by stage of fabrication, were as follows:

1970	\$million	% of Total*
Crude materials	2.0	3.6
Fabricated materials	13.2	23.9

ONTARIO EXPORTS TO AFRICA

Asia

Ontario exports to Asia in 1970 were \$153.5 million, or 2.0% of total Ontario exports. There has been remarkable economic progress and growth in most Asian countries. However, the major contributing factor to the rise in Ontario exports to this region is our exports to Japan. The sustained expansion of the Japanese economy led to the increase in Ontario exports to Japan, from \$52.4 million in 1969 to \$71.3 million in 1970. There is a relatively large share of crude materials in our exports to Japan, due to the fact that Japan is the world's largest importer of raw materials.

Apart from Japan, there were impressive industrial developments in other Asian countries, e. g., Taiwan, Singapore, Malaysia, Hong Kong and South Korea. Other countries in this region have also achieved some industrial growth, though perhaps not as impressive as the former.

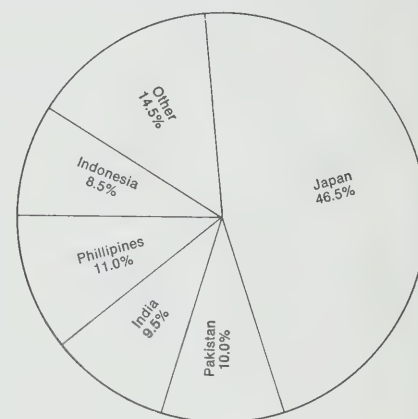

Ontario exports to Asia, 1970, by countries in percentage were as follows:

Ontario Domestic Exports to Asia in 1970, by stage of fabrication, were as follows:

1970	\$millions	% of Total*
Crude materials	39.7	26.4
Fabricated materials	48.9	32.5
End products	61.8	41.1

*Total of Ontario Domestic Exports, not including "Special Transactions, Trade".

ONTARIO EXPORTS TO ASIA

Oceania

In this region, Australia is by far our best customer. From total Ontario exports to the Region of \$110 million in 1970, Australia's share was \$95.6 million. With the enormous discoveries in mineral resources, the economic foundation of Australia is undergoing drastic transformation. The mining industries themselves are having an important influence on Australia's manufacturing industries. The spectacular growth of Australia's economy in recent years has been heavily supported by growing exports.

Although New Zealand's industrial sector is of less importance than the primary sector, the output of its secondary industry is increasing in volume and value. With \$13.5 million of Ontario exports in 1970, New Zealand represents an important Ontario foreign market.

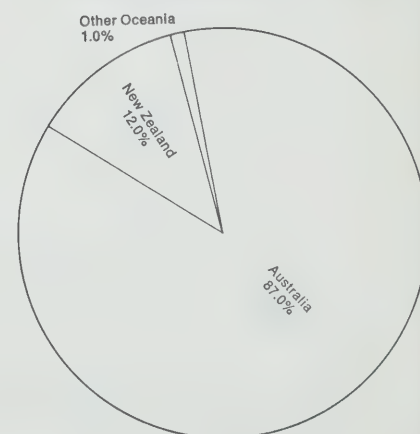

Ontario exports to Oceania in 1970 in percentages were as follows:

Ontario Domestic Exports to Oceania in 1970, by stage of fabrication, were as follows:

1970	\$million	% of Total*
Crude materials	4.6	4.4
Fabricated materials	29.3	27.7
End products	71.9	67.9

*Total of Ontario Domestic Exports not including "Special Transactions, Trade".

ONTARIO DOMESTIC EXPORTS TO OCEANIA

South America

Ontario exports to South America increased from \$161.0 million in 1969 to \$191.5 million in 1970. The principal factor in this rise was the increase in Ontario's exports to Brazil and Venezuela, which more than offset the decrease in Ontario exports to Argentina, Chile, Peru and Uruguay.

As a region, South America has at present the greatest economic potential and the fastest growing population of any of the developing areas of the world. The economy of South American countries as a whole, is moving steadily upward, and there is room for substantial new business developments. Each year, a larger percentage of the population enters the market economy, with ever-increasing purchasing power.

There is no uniform South American market as such; there are marked differences among South American countries in the degrees of economic development. There are both, less developed and more developed countries.

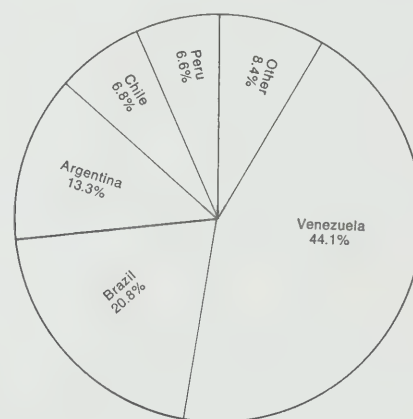

Ontario exports to South America, 1970, by countries, in percentage, were as follows:

Ontario Domestic Exports to South America in 1970, by stage of fabrication, were as follows:

1970	\$million	% of Total*
Crude materials	1.3	0.8
Fabricated materials	31.6	18.2
End products	140.8	81.0

*Total of Ontario Domestic Exports not including "Special transactions, trade".

ONTARIO EXPORTS TO SOUTH AMERICA

Central America and Antilles

Ontario exports in 1970 to Central America and Antilles were \$145.3 million, or 1.9% of total Ontario exports. Mexico, with \$44.7 million, is the leading Ontario market in this region. During the past decade, manufacturing has become an important and dynamic sector in the economic growth of Mexico. Increasing investment in productive activities and a climate of monetary stability have influenced this growth. Import substitution, which was one of the principal goals of Mexican economic policy was changed recently, and the present emphasis is on promoting manufactures for export.

In value of Ontario exports in 1970, Mexico is followed by Puerto Rico with \$19.9 million, Jamaica with \$18.2 million, and the Dominican Republic with \$11.9 million. There were six other countries in the region where Ontario exports in 1970 exceeded \$3 millions.

The process of industrialization in this Region, with the exception of Mexico, is still in the initial stages of growth. Manufacturing, from the standpoint of its contribution to GNP, is of relatively minor importance. Until recently, manufacturing was very much oriented toward national markets. With the formation of the Central American Common Market (Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua), avenues have been opened to a wider market, better use of installed capacity, and new investment opportunities.

The Caribbean countries, which form part of the Region, are developing countries; they are basically primary producers, shipping a few commodities to other countries. Their economy is largely dependant on agriculture and mining. The economic growth of the whole area is not identical. Available natural resources, and geopolitical situations have influenced their economic development. In general, industrialization of the area is limited in potential because of a small domestic market and capital deficiency.

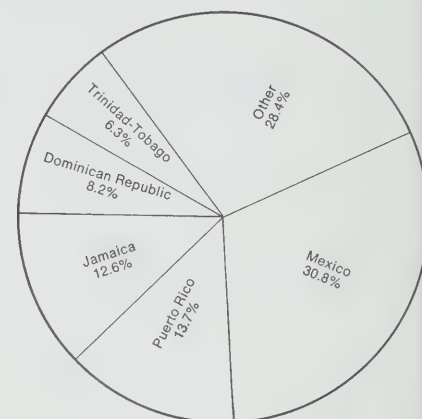

The Ontario exports, 1970, to selected countries in the region, in percentage were as follows:

ONTARIO EXPORTS — CARIBBEAN

Ontario domestic exports to Central America, Antilles, in 1970 by stage of fabrication, were as follows:

1970	\$million	% of Total*
Crude materials	7.8	5.6
Fabricated materials	39.9	28.7
End products	91.3	65.7

*Total of Domestic Exports, not including "Special Transactions, Trade".

The United States

The United States overshadowed all other countries in the amount and growth of Ontario exports. In 1970, Ontario exports to the United States amounted to \$5.9 billions. This was a 4.4% increase over 1969 exports. Passenger cars and parts exported under the Canadian-US automotive agreement, made up a major sector of Ontario exports to the U.S. (54.2%).

Canada is currently the best market for U.S. exports, having taken 18-22% of United States exports in 1969-1970. Canada is also the largest United States supplier, having accounted for 20-24% of its imports in 1969-1970.

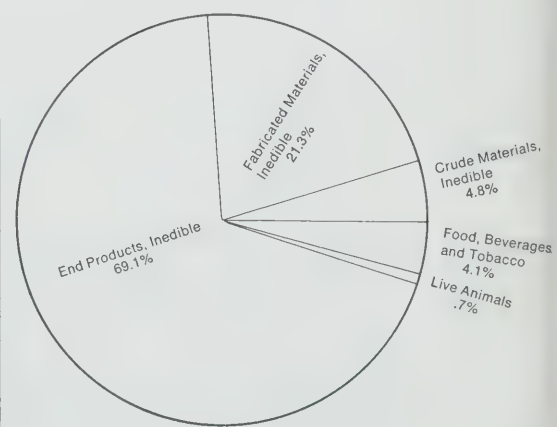

Ontario exports to the U.S. by commodities in 1970 in percentages were as follows:

ONTARIO EXPORTS TO THE U.S.

By stage of fabrication, our Domestic Exports to the United States were as follows:

1970	\$millions	% of Total*
Crude materials	361.1	6.4
Fabricated materials	1,205.9	21.5
End products	4,054.1	72.1

*Total of Ontario Domestic Exports not including "Special Transactions, Trade", consequently, a slight variation in percentages from the foregoing diagram.

July 24, 1972

Dear Sirs:

I am attaching our recently published Ontario Exports by Countries 1970 and Ontario Exports by Commodities 1970. These books show, on a commodity basis, as well as a country basis, both Canadian and Ontario export performances for two years and their percentage of change. This is part of our export market identification program that attempts to isolate specific markets for specific Ontario products.

Exports represent 21.4% of Ontario's Gross Provincial Product, in comparison with 4.4% in the United States; 16.1% in the United Kingdom; 18.4% in West Germany and 12.1% in France. This high share of exports in our Gross Provincial Product makes exports a very sensitive factor in our economy, and our export performance is closely related to the expansion of Ontario's economy.

The dominant characteristic of the modern world economy is its interdependence. For this reason, the growth of our exports is not an independent factor; it is influenced greatly by the overall growth of world trade, economic conditions in countries which are buying our products and our general trade relations with these countries.

We will be glad to answer any questions relative to Ontario exports, as well as give you any available trade data which could serve to enhance Ontario's trade relations with other countries.

Yours very truly,

A handwritten signature in dark ink, reading "Joseph V. Lehner".

Joseph V. Lehner
